

Grand Rounds
Friday, May 2, 2003, 12:00 pm – 1:00 pm
4th Floor Auditorium

**Did Exposure to Oil Well Fire Smoke in the Gulf War Increase the Risk
of Asthma among Veterans?**
A Review of Three Recent Studies

Presented by

David N. Cowan, Ph.D., M.P.H.
Associate Director, Research
Deployment Health Clinical Center
Walter Reed Army Medical Center

Learning Objectives:

- ❖ **Identify key methodological challenges in conducting environmental epidemiological research among Gulf War veterans**
- ❖ **Describe how errors in exposure and outcome measure can affect study findings.**
- ❖ **List key strengths and weaknesses of each study**

Sponsored by the War-Related Illness and Injury Study Center (WRIISC-DC).
For questions, contact Dr. Andrew Lincoln, x6207.
